PROJECTS

Survival - Based Open World Game

August 2024 - October 2024

Developed a first-person, open world survival game where player must reach safty castle while eliminating all targets within a time limit using Unreal Engine and Blender.

3D Side-Platformer Game.

January 2025 - March 2025

Designed and Developed a 3D side-platformer mobile game in Unreal Engine inspired by Only Up, Getting over it and Mario-Bros, Combined with realistic physics controls to create a highly engaging and skill-based gameplay experience.

Thronfall: Shadow Regim

June 2025 - Present

A Third-person Souls like combat mobile game built in Unreal Engine inspired by games like Elden Rings and God of War. Built core gameplay systems including melee combat, HealthBar, StaminaBar, enemy and boss AI, Dodging, healing, Inventory and weapon pick-ups. Designed a target lock-on system with strafe movement for mobile friendly controls. Currently finalizing UI and polish for a playable version.

EDUCATION & CERTIFICATIONS

Flutter beginners by FreeCodeCamp
Flutter Development by NetNinja
Oracle Academy Certificate For sql/mysql.
Udemy course for Game-Design and programming.

EXTRACURRICULAR ACTIVITIES

Event Winner & Event Coordinator

Winner of Technical IT-QUIZ at University in second
Coordinated a major university event, demonstrating leadership and team-collaboration skill.

Industry Visit at Antier Solution - Chandigarh

Explored blockchain development, smart contracts and decentralized applications. We gained hands-on insights into blockchain security, NFT platforms and real world implementation challenges.
